ritual is one of the most discussed cultural practices yet its treatment in anthropological terms has been seriously limited characterized by a host of narrow conceptual distinctions one major reason for this situation has been the prevalence of positivist anthropologies that have viewed and summarized ritual occasions first and foremost in terms of their declared and assumed functions by contrast this book which has become a classic investigates them as epistemological phenomena in their own right comparing public events a domain

which includes ritual and related occasions the author argues that any public event must first be comprehended through the logic of its design it is the logic of organization of an occasion which establishes in large measure what that occasion is able to do in relation to the world within which it is created and practiced

containing original essays historical narratives biographical memoirs sketches of society topographical descriptions novels and tales anecdotes select extracts from new and expensive works the spirit of the public journals discoveries in the arts and sciences useful domestic hints etc etc etc

in 1993 m kontsevich proposed a conceptual framework for explaining the phenomenon of mirror symmetry mirror symmetry had been discovered by physicists in string theory as a duality between families of three dimensional calabi yau manifolds kontsevich s proposal uses fukaya s construction of the a category of lagrangian submanifolds on the symplectic side and the derived category of coherent sheaves on the complex side the theory of mirror symmetry was further enhanced by physicists in the language of d branes and also by strominger yau zaslow in the geometric set up of special lagrangian torus fibrations it rapidly expanded its scope across from geometry topology algebra to physics in this volume leading experts in the field explore recent developments in relation to homological mirror symmetry floer theory d branes and gromov witten invariants kontsevich soibelman describe their solution to the mirror conjecture on the abelian variety based on the deformation theory of a categories and ohta describes recent work on the lagrangian intersection floer theory by fukaya oh ohta ono which takes an important step towards a rigorous construction of the a category there follow a number of contributions on the homological mirror symmetry d branes and the gromov witten invariants e g getzler shows how the toda conjecture follows from recent work of givental okounkov and pandharipande this volume provides a timely presentation of the important developments of recent years in this rapidly growing field
